

DESCRIPTION:

Multi Cover Basic is a non-woven moisture and shock-absorbent protective fleece for the temporary protection of all kinds of surfaces. Multi Cover Basic consists of two layers. The underlayer is a non-slip film, which means it always stays firmly in place. The soft upper layer consists of recycled textiles that have been compressed and thermally welded together onto the underlayer. The textile upper layer provides good shock absorption and is moisture-absorbent. Paint or other substances are collected and absorbed, while the underlayer prevents leaks.

APPLICATIONS:

- COVER CARPET
- COVER LAMINATE
- COVER LINOLEUM
- COVER TILES
- COVER CONCRETE FLOOR
- COVER PVC FLOOR
- COVER EXTERIOR FLOOR

CHARACTERISTICS:

- SHOCK-ABSORBENT
- MOISTURE-ABSORBENT
- REUSABLE
- MOISTURE-PROOF

TECHNICAL DATA:

Application duration	Unlimited
Storage	Unlimited (5° – 30° C) (dry, no direct sunlight)
Thickness	2.5mm +/- 10%
Weight	220 gr/m ²
Winding	Reverse wound

COMPOSITION:

Material	Non-woven en Polyethyleen
Color	Gray
